

Commissioned third party to fulfill the legal obligations:

GWMD (including the brands WEY and GWM ORA) has closed a multi-year contract valid Germany-wide with a certified take back and disassembly operation for end-of-life vehicles. This commissioned third party guarantees free take back for the last owner of end-of-life vehicles within three working days and provides the certificate of destruction without delay. The take back can be initiated by the last owner as well as an GWMD commissioned partner and take back location (for example an official service and workshop partner).

Contact information:

Please refer to our partner to return end-of-life vehicles:

PRIOREC GmbH, Robert-Bosch-Straße 1-5, 85053 Ingolstadt, www.priorec.de

The following contacts are available for take back:

Portal: www.priorec.de/return

Email: return@priorec.de

Hotline: +49 (0)841 9646-80

Disposal of high voltage batteries and vehicles involved in an accident:

It is also possible via the contact to register vehicles involved in an accident, fire damaged vehicles or also high voltage batteries from WEY and GWM ORA vehicles German-wide for collection and for recycling. As far as GWMD does not bear the costs incurred insofar, unified conditions in line with the market are agreed with the commissioned third party.

Reporting according to the legal requirements:

The third party commissioned by GWMD is additionally responsible for the legally required and annual reporting, as well as for the taken back and recycled high voltage batteries and fulfilling the legally defined recycling rates for end-of-life vehicles. These are published on this homepage starting in 2022.

Reuse and further use:

GWMD and its partner jointly ensure that end-of-life vehicles and vehicles involved in an accident are not only recycled as much as possible and disposed of in requirement with the law. The conditions for disassembly, processing, and further use of disassembled vehicle components as well as the use of used and tested high voltage battery modules for so-called 2nd life applications are jointly made. GWMD thus takes over responsibility beyond the legal framework for its products to protect our environment and conserve our resources.
